ILLUSTRATIVE TEXT FOR TESTING - NOT AN OFFICIAL RWANDA FDA DOCUMENT

GUIDELINES ON ADMINISTRATIVE DOCUMENTS FOR PRODUCT REGISTRATION
Version 2026-01

1. Cover letter
Every application starts with a cover letter on the applicant's letterhead. It identifies the product (brand name, generic or common name, strength or net content, and form), states the type of application, and is signed and dated by a responsible person of the applicant, whose name and title are given.

2. Power of attorney
When the applicant is not the manufacturer, the manufacturer or the marketing authorization holder must give a power of attorney to the local technical representative in Rwanda. The power of attorney names the product, names the local technical representative, states that it may act on the manufacturer's behalf before Rwanda FDA, and is notarized. An unsigned or un-notarized power of attorney is not accepted.

3. Application form
The application form must give the product name, the common name or active ingredient, the strength or net content, the form, the intended use, the storage conditions with a temperature, the shelf life, and the manufacturer's name and site address. A P.O. Box alone is not a site address.
