ILLUSTRATIVE TEXT FOR TESTING - NOT AN OFFICIAL RWANDA FDA DOCUMENT

GUIDELINES ON REGISTRATION OF COSMETIC PRODUCTS

Version 2026-01

1. Good manufacturing practice

The manufacturer must hold a cosmetics GMP certificate according to ISO 22716, or an equivalent certificate from a competent authority, valid on the date of submission and naming the manufacturing site.

2. Ingredient list

The full ingredient list gives every ingredient by its INCI name with its concentration as a percentage (w/w). Restricted ingredients must be within the permitted limits.

3. Product safety assessment

The product safety assessment report evaluates the safety of the finished product for its intended use. It is signed and dated by a qualified safety assessor, whose qualifications are stated.

4. Labelling

The label lists the ingredients by INCI name, states the net content, the function of the product unless obvious, precautions for use, and the batch number.
